

NIACINAMIDE, ZINC & PREBIOTIC SERUM

With the highest level of actives in the range, this product is really designed as a spot treatment product for dotting onto blemishes for targeted treatment, but could also be used as a serum. It has a natural gum thickened base and is enriched with soothing allantoin and betaine and nourishing aloe vera. It also has some sodium hyaluronate for moisturisation.

NIACINAMIDE

A form of Vitamin B, beneficial to almost any skin type. Works to even skin tone, reduce pore size and repair UV damage.

ZINC PCA

A zinc salt combined with L-PCA, a natural moisturising factor, which helps control sebum production. The zinc component may help limit the growth of undesirable bacteria which cause blemishes.

PREBIOTIC

Works to normalise the skin microbiome and boost the skin barrier after disruption from pollution, light, and chemicals.

DIRECTIONS FOR USE

Apply to freshly cleaned skin, and blend in until fully absorbed.

Warnings:

For external use only. Avoid contact with eyes. Keep out of the reach of children. Do not store in direct sunlight. Avoid using along with exfoliating acids or Vitamin C in your routine.

COMBATS

Blemishes, hyperpigmentation, open pores and oily skin

BENEFITS

Hydrate, nourish, soothe.

SKIN TYPE

All Skin Types

ETHICAL
